Also looping in Ruth. She's the CIC for the Superfund site and will take over for comms/community involvement at this site (looping me in for press when needed). We will both be on the 10 a.m. call this morning.

Hey Paul,
Could you check in with the state to see when the sample results are available or could you find a number he can call? I'll provide him the FAQ that we came up with yesterday and advise him to call Carus hotline to get damaged property replaced or have his property cleaned.

He did tell me the product was covered over his entire property after the press meeting on the 11th. I sent START out the next day and they couldn't find much. I had the health dept call him to advise him on any medical concerns.

Cc'd Rachel on this so she's aware there's still some concerns in the community.

Thanks,
Rob

Robert,

This is Ex. 6 Personal Privacy (PP) gave you my contact information at the city press conference. You sent epa guys to test the product that was dumped on me and my property. How do I get the results to the tests that they took. I am not comfortable with how this is being down played as safe. It's ate the paint off my porch , my trucks , ate thorough the rubber dog toys in the yard as well. I can go on. How the epa can say we are ok is mid blowing to me. We are getting the run around from everyone. City sends us to your website for updates which in return goes back to the city website or carus.

Please contact me , as you know I am a very intelligent guy and need answers. Look forward to hearing back asap
